

SOUNDSPHERE®

The Best Sound Around™

Soundsphere omnidirectional speakers and speaker systems feature hemispherical dispersion and full-range sound, creating solutions for a multitude of applications and environments.

- **Faster Install**

Soundsphere speakers installation is much faster and saves you money!

- **Better Coverage**

Our speakers have better coverage area, which means you need fewer speakers.

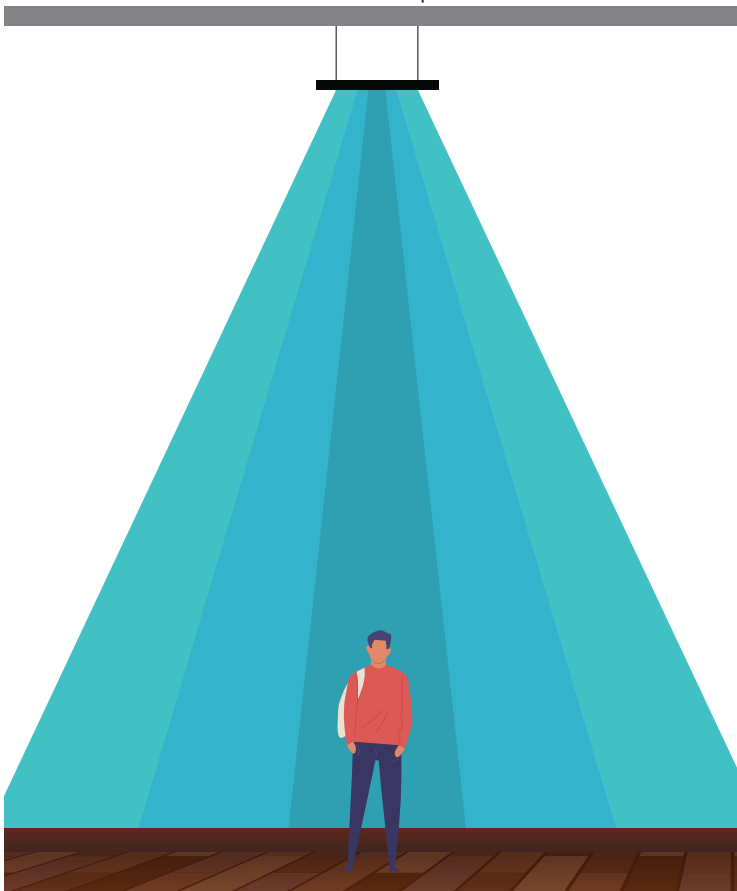

- **Rugged Construction**

The quality of materials make them resistant to potential damage in facilities like gymnasiums and factories.

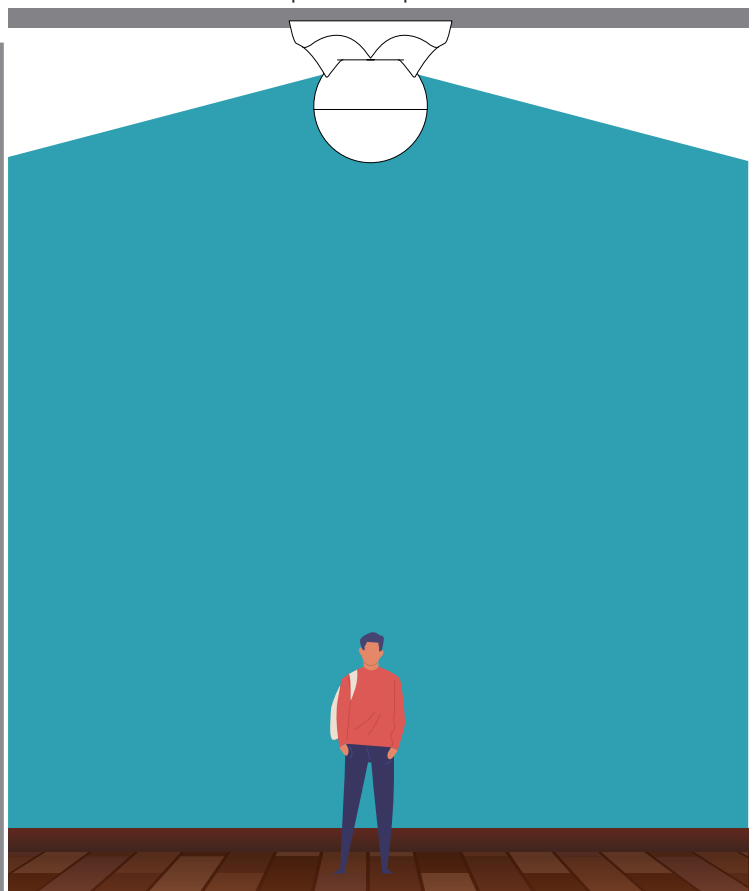

- **Ease of Specification**

Documentation easily accessed on the website

Conventional Speakers

Soundsphere® Speakers

Every Soundsphere omnidirectional speaker produces a hemisphere of **full-frequency sound**. Conventional speakers produce coverage patterns that vary with frequency. You may have noticed this phenomenon in places with common ceiling speakers; you hear the bass everywhere, but as you move away from the speaker, the mid- and high-frequency sounds disappear.

Soundsphere speakers produce low, mid and high frequencies equally throughout their 180° x 360° area of coverage, maximizing speech intelligibility and music quality under — and to all sides of — the speaker.

110B

Seamless background music and clear voice announcements. A compact, unobtrusive speaker.

Q-6

Full-range music and voice. Soundsphere's most compact weatherproof loudspeaker.

Q-12A

Maximum power for high sound pressure levels. Clear voice announcements and high-fidelity foreground music.

110 Page

Critical announcements that need to be both heard and understood in high-noise environments.

Q-8

Full-range music and voice. More robust, offering greater sensitivity and power-handling capability.

Q-12AWR

High sound pressure levels for outdoors. Weatherproof version of Q-12A.

The Best Sound Around.™

Soundsphere speakers are light in weight and can be installed easily and quickly. Even large systems can be installed in a day or less. Speakers are available in several standard colors and can be made to coordinate with any existing color scheme.

Soundsphere products are made in the USA.
